INDEX TO VOLUME XIII.

A.

Abich, on Mt. Ararat, 269.
Academy of Nat. Sci. Philad., Transactions of, noticed, 303.
proceedings of, 152, 304, 450.
Agassiz, L., Note on the Genus Tiaropsis, 425.
Infusoria, the larval state of intestinal worms, 425.
Planariæ, closely related to intestinal worms, 425.
Cumæ the young of Macroura, 426.
Alder and *Hancock*, work by, on British Nudibranchiate Mollusca, noticed, 303.
America, climatology of Arctic, 439.
Ammonias, on the Compound, *T. S. Hunt*, 206.
Ammoniacal compounds of cobalt, 115.
Analysis, determination of phosphorus in, *Reynoso*, 114.
ibid. *W. J. Craw*, according to Sonnenschein's method, 393.
Animals of British seas, ranges in depth, *Forbes*, 125.
freezing of, 84, 143, 438.
Apteryx in London, 300.
Arabia, notes on, 134.
Ararat, Mt., *Abich*, 269.
Archiac and *Haime* on Nummulites, noticed, 449.
Artificial crystallization of some substances, *Ebelmen*, 110, 411.
of zinc oxyd about furnaces in New Jersey, 417.
Asphaltum, Coal of New Brunswick so called, 276.
Aurora of Sept. 29, 1851. *L. R. Gibbes*, 128.
February 19, 1852, *D. Olmsted*, 426.
D. Kirkwood, 430.
Australia, Gold in, 118, 297.

B.

Barrande. Silurian System of Bohemia, 117.
Barton, E. H., Report by, on the Meteorology, Vital Statistics, &c., of New Orleans, by, noticed, 449.
Bismæthyl, *D. Breed* on, 404.
Blake, J., on the diluvial deposits of California, 385
Blake, W. P., notices of Chlorite, Sapphire, Lievrite, Ores of lead &c., 116.
on zinc oxyd as a furnace product in New Jersey, 417.
Bohemia, Silurian System of, *Barrande*, 117.
Boston Soc. Nat. Hist., Proceedings of, 152, 304, 450.
Botanical Literature, notices of, *A. Gray*, 42, 424.
Boye, M. H., Analysis of a Nickeliferous magnetic pyrites, 219.
Breed, D., on Bismæthyl,, 404.
phosphoric acid in normal human urine, 224.
Buckley, S. B., Notice of some large Trees in New York, 397.
Bulletin of Geol. Soc. of France, extracts from, 267.
Burnett, W. I., Relations of Embryology and Spermatology to some of the fundamental doctrines of physiological science, 281.

C.

Cacodyle series, *T. S. Hunt*, 206.
Caillaud, on the perforation of rocks by Pholades, 287.
California, on the diluvial deposits of, *J. Blake*, 385.
climate of San Francisco in, 433.
Candles, Manufacture of, *W. Carpmael*, 139.
Cavendish Society, 144.
Caves in the Tyrol, 267.
Cavern with Bones in France, *A. Daubrée*, 267.
Cements, process for certain, 16, 22.
Channing, W. F., Application of the Municipal Electric Telegraph to Fire alarms, 58.
Chemistry of Perfumery, *Hofmann*, 413.
Chinese horology, *D. J. Macgowan*, 241.
Chlorine, new mode of preparing, *Mauméné*, 412.
Chlorite, polarization of Achmatowsk, *W. P. Blake*, 116.
Christison, Gamboge Tree of Siam, 137
Church, A. E., Elements of Analytical Geometry by, noticed, 147.
Claudet, Ammoniacal compound of Cobalt, 115.
Cleveland, Climate of vicinity of, 215, 293.
Climate of Egypt, notes on, 133.
of Nischne Tagilsk, 143.
of San Francisco, *H. Gibbons*, 433.
Climatology of Arctic America, 439.
Coal of Burdwan Mines, analysis of, *H. Piddington*, 118.
of New Brunswick, called asphaltum, Reports on, 276.
Coan, T., letter by, on eruption of Mt. Loa in 1851, 395.
Cobalt, ammoniacal compounds of, 115.
Coffin, W., effects of lightning, 134.
Colors, accidental, resulting from looking at white objects, *Seguin*, 441.

INDEX TO VOLUME XIII.

Burnett, W. I., Relations of Embryology and Spermatology to some of the fundamental doctrines of physiological science, 281.

C.

Cacodyle series, *T. S. Hunt*, 206.
Caillaud, on the perforation of rocks by Pholades, 287.
California, on the diluvial deposits of, *J. Blake*, 385.
climate of San Francisco in, 433.
Candles, Manufacture of, *W. Carpmael*, 139.
Cavendish Society, 144.
Caves in the Tyrol, 267.
Cavern with Bones in France, *A. Daubrée*, 267.
Cements, process for certain, 16, 22.
Channing, W. F., Application of the Municipal Electric Telegraph to Fire alarms, 58.
Chemistry of Perfumery, *Hofmann*, 413.
Chinese horology, *D. J. Macgowan*, 241.
Chlorine, new mode of preparing, *Mauméné*, 412.
Chlorite, polarization of Achmatowsk, *W. P. Blake*, 116.
Christison, Gamboge Tree of Siam, 137
Church, A. E., Elements of Analytical Geometry by, noticed, 147.
Claudet, Ammoniacal compound of Cobalt, 115.
Cleveland, Climate of vicinity of, 215, 293.
Climate of Egypt, notes on, 133.
of Nischne Tagilsk, 143.
of San Francisco, *H. Gibbons*, 433.
Climatology of Arctic America, 439.
Coal of Burdwan Mines, analysis of, *H. Piddington*, 118.
of New Brunswick, called asphaltum, Reports on, 276.
Coan, T., letter by, on eruption of Mt. Loa in 1851, 395.
Cobalt, ammoniacal compounds of, 115.
Coffin, W., effects of lightning, 134.
Colors, accidental, resulting from looking at white objects, *Seguin*, 441.

Comet, first of 1851, discovered by *D'Arrest*, 127.
Second of 1851, discovered by *Brorsen*, 128.
Third of 1851, discovered by *Brorsen*, 426.
Confectionary, substances used in flavoring, 413.
Congelation of plants, *J. Le Conte*, 84
Coral reefs, causes modifying forms of, *J. D. Dana*, 34.
origin of the Channels within barriers, and of the atoll form of islands, *J. D. Dana*, 185.
and Islands, on Geographical distribution of, *J. D. Dana*, 338.
Craw, W. J, analysis of Clinochlore, 222.
determination of phosphoric acid by molybdate of ammonia, 393.
Crenate of Lime in stalactites, *D. A. Wells*, 11.
Crystals, isomorphous, optical properties of, *Senarmont*, 409.
on lettering figures of, *J. D. Dana*, 399.
of regular system, on double refraction produced in, by compression, *Wertheim* 411.
Crystal Palace, *W. Whewell's* lecture on the Exhibition at, 352.
Crystallization in the dry way, researches on, *Ebelmen*, 411.
Crustacea Corystoidea, classification of, *J. D. Dana*, 119.
Crustacea Paguridea, *J. D. Dana*, 121.
Genus Orthostoma and the Telphusidæ, 123.
Genus Heterograpsus of Lucas, 124.

D.

Daguerreotypes by electric light, 143.
Dana, J. D., on Coral reefs and Islands, 34, 185.
Classification of the Corystoidea, 119.
on the Paguridea, 121.
on the Genus Orthostoma and the Telphusidæ, 123.
Genus Heterograpsus, 124.
Geographical Distribution of Coral reefs and Islands, 338.
on lettering figures of Crystals, 399.
Note on Hauslab's Crystal Theory of the Globe, 424.
Daubeny, C., An introduction to the atomic theory, 303.
Daubrée, A., Cavern with bones in France, 267.
Day's Algebra, noticed, 444.
Dead Sea, Coral in, 297.
Features of valley of, 297.
De Candolle, A. P., Biography of, by *De La Rive*, noticed, 150.
Declination, method of recording differences in, *O. M. Mitchel*, 1.
Dekay, J. E., obituary notice of, 300.
Desor, E., Drift of Lake Superior, 95.
Dessaignes, on propylamine in plants, 114.
Diluvial deposits or drift of California, *J. Blake*, 385.
Drift of Lake Superior, *E. Desor*, 93.
Drilling holes in glass, mode of, 26.
Downes, J., Occultations visible in the United States, by, noticed, 303.

E.

Earth, researches on mode of cooling, thickness of crust, &c., *H. Hennessy*, 271.
Ebelmen, on crystallization of some substances, 110, 411.
Eclipse of sun, optical investigations connected with, 440.
Ehrenberg, on a fall of Red Snow in Switzerland, 442.
Egypt, notes on climate of, 133.
Egyptians, *S. G. Morton's* views on the, 166.
Electric telegraph applied to fire alarms, 58.
Electro-magnetism, method of recording differences in N. P. distance, by *O. M. Mitchel*, 1.
Electro-telegraphic progress, 300.
Engraving, on copying copper plate, on stone 292.
Elements of Analytical Geometry, by *A. E. Church*, noticed, 147.
Entomology, new species in, *J. P. Kirtland*, 336.
Erdmann on the Dannemora iron beds, noticed, 449.
Espy, J. P., Report by, on Meteorology, noticed, 450.
Ethyl, telluret of, *Mallet* 113.
Etna, an excursion on, *B. Silliman, Jr.*, 178.
Exhibition at Crystal Palace, *Whewell's* lecture on, 352.
Eye, refracting power, &c., of, *J. D. Forbes*, 413.

F.

Faber, W. L., on Carrollite, 418.
Faraday, on ozone, 261.
Fire alarms, electric telegraph applied to, *W. F. Channing*, 58.
Fish, resuscitation of frozen, 143, 438.
Fishes, Catalogue of Malayan, by *T. Cantor*, noticed, 303.
Forbes, E., recent researches into the Natural History of the British Seas, 124.
Forbes, J. D., on the eye, 413.
Fordos and *Gelis*, on sulphid of nitrogen, 114.
Freezing of Vegetables, *J. Le Conte*, 84.
of Animals, 84, 143, 438.
Fat, constitution of human, *Heintz*, 260.

G.

Galvanic battery, economical constant, *C. G. Page*, 257.
Gamboge Tree of Siam, *Dr. Christison*, 137.
Gases, magnetic relations of, *Plücker*, 110.
Geodes filled with water, 267.
Geological Society of France, Extracts from Bulletin of, 271.
Notice of Memoirs of, 271.
Geology—Silurian of Bohemia, *Barrande*, 117.
Gibbes, L. R., Aurora of Sept. 29, 1851, 128.
on Xenotime of Ga., 142.
Gibbs, W., Chemical abstracts, 110, 260, 409.
Gibbons, H., Climate of San Francisco, 433.
Girard, C., work by, on the Cottoids of America, noticed, 448.
Glass, mode of drilling holes in, 26.

Goadby, H., on making wet preparations of animal substances, 15, 227.
Gold in Australia, 118, 297.
Gray, A., notices of Botanical literature, 42, 424, 425.
Grissell's improvements in coating metals, 135.
Gutta percha in Photography, 300.
Guyot, A., on the Topography of New York, 272.

H.

Hailstorms in India, 294.
Halos and Parhelia, *C. M. Tracy*, 433.
Hauslab, on the octahedral character of the Globe, 268.
Hauslab's Crystal Theory of the Globe, note on, *J. D. Dana*, 424.
Hawaii, eruption of Mauna Loa, in 1851, 299, 395.
Heintz, constitution of human fat, 260.
Henessy, H., Researches in Terrestrial Physics by, noticed, 271.
Hildreth, S. P., Meteorological observations made at Marietta, Ohio, 237.
Hopkins, E., work by, on the Connection of Geology with Terrestrial Magnetism, noticed, 302.
Horsford, Permeability of metals to mercury, 305.
Hosking, W., on ventilation by the parlor fire, 249.
Hubbard, O. P., gigantic beryls of Grafton, N. H., 264.
Hunt, E. B., Views on the Nature of Organic Structure, 53.
Hunt, R., on Photographs, noticed, 302.
Hunt, T. S., on the Compound Ammonias, and the bodies of the Cacodyle Series, 206.
on octahedral oligist iron, including observations on isomorphism, 370.
Hydrobarometer, *Walferdin*, 269.

I.

Iconographic Encyclopedia, 150.
India, Hailstorms in, 294.
Insects, new, of genera Libythea and Macroglossa, *J P. Kirtland*. 336.
on preserving Lepidopterous, 286.
Infusoria, new, *A. S. Johnson*, 33.
the larval state of intestinal worms, *L. Agassiz*, 425.
Intestinal worms, the parents of infusoria, *L. Agassiz*, 425.
Iron beds of Dannemora, *Erdmann* on, noticed, 449.
Isomorphous substances, optical properties of, *Senarmont*, 409.
Isomorphism, views on, *T. S. Hunt*, 370.

J.

Johnson, A. S., on some infusoria, 33.
notice of a new object-glass, made by *C. A. Spencer*, 31.

K.

Kirtland, J. P., climate, &c. of the south shore of Lake Erie, 215, 293.
method of preserving Lepidoptera, 286.
Kirtland, J. P., a new Libythea and Macroglossa, 336.
Knapp's chemistry, noticed, 443.
Kunze's Supplement to Schkuhr's Carices, noticed, 424.

L.

Lake Erie, climate, &c., of south shore of, 215, 293.
Lake Superior, drift of, *E. Desor*, 95.
Lassell, E., obituary notice of, 300.
Lathrop, S. P., resuscitation of frozen fish, 143.
LeConte, Prof. J., on the freezing of vegetables, 84, 195.
LeConte, J. L., on meteoric iron of Sonora, Mexico, 289.
Leighton, W. A., work by, on Angiocarpous Lichens, noticed, 303.
Leonhard's elements of geology, noticed, 448.
Lepidoptera, on preserving, 286.
Lieber, O. M., appointed professor in the university of Mississippi, 144.
Light House system of the U. States, report on, 318.
Lightning, effects of, *W. Coffin*, 134.
Limestone or marble monuments, on preserving, 298.
Lyceum of Nat. Hist. of N. York, Annals of, noticed, 303.
Lyman, J., account of a reflecting telescope made by, *A. Caswell*, 129.

M.

Macgowan, D. J., on Chinese horology, 241.
Magnetic needle at Paris, declination and inclination of, 443.
Magnetic relations of gases, *Plücker*, 110.
Mallet, on telluret of ethyl, 113.
Manganese, on the distribution of, *D. A. Wells*, 9.
Mantell, G. A., reptile remains in old red sandstone, 278
work by, on organic remains of British museum, noticed, 407.
Marble, means of preserving, *Rochas*, 298.
Martius's Flora brasiliensis, noticed, 425.
Maumené, new mode of preparing nitrogen and chlorine, 412.
Maury's wind and current chart, 149.
Meigs, C. D., memoir of *S. G. Morton*, 153.
Mercury, permeability of metals to, *Horsford*, 305.
Metals, *Grisell's* improvements in coating, 135.
Meteoric iron of the Mexican province of Sonora, 289.
Meteorite of Schwetz, *G. Rose*, 142.
Meteorological instruments, used by the Smithsonian Institution, 288.
observations, made at Marietta, Ohio, *S. P. Hildreth*, 237.
made at Burlington, Vt. 350.
at San Francisco, 433.
system for sea and land, correspondence on, noticed, 301.
Meteorology, action of British government with reference to, 143.
of St. Bernard and Geneva, in 1851, 296.
of Alabama, Jan. 1852, 294.
J. P. Espy's report on, noticed, 450.

Microscope, new object-glass made for, by *C. A. Spencer*, 31.
Microscopic object-glasses, improvements in, by *C. A. Spencer*, 290.
MINERALS.—
Allanite from West Point, *C. Bergemann*, 416.
Beryls in N. H., large, *O. P. Hubbard*, 265.
Carrollite, a new cobalt mineral, *W. L. Faber*, 418.
Chalcotrichite of Pa., 117.
Chlorite, polarization of, *W. P. Blake*, 116.
Clinochlore, analysis of, *W. J. Craw*, 222.
Dimagnetite, *C. U. Shepard*, 392.
Eumanite, angles of, 117.
Gold of Australia, 118.
Jenkinsite, *C. U. Shepard*, 392.
Lead ores of Pa., 116.
Lievrite, of Orange Co., N. Y., 117.
Martite, *T. S. Hunt*, 370.
Nickel, sulphuret of, of Pa., 117.
Nickeliferous magnetic pyrites, analysis of, *M. H. Boye*, 219.
Saponite, a mineral resembling, *D. D. Owen*, 423.
Sapphire, red of N. J., 116.
Strontianite in N. Y., 264.
Thalite, a new mineral, *D. D. Owen*, 420.
Xenotime of Ga. and N. C., 142, 143.
Minerals, artificial formation of, *Ebelmen*, 110, 411.
Mitchel, O. M., on a new method of recording N. P. distance or declination by electro-magnetism, 1.
Moon's surface, note on a paper on, by *J. Nasmyth*, 300.
Morton, S. G., memoir of, by *C. D. Meigs*, 153.

N.

Narcotin, new varieties of, *Wertheim*, 260.
Nasmyth, on the moon, 300.
New Jersey Zinc works, 430.
New York, remarks on topography of, *Guyot*, 272.
New York Journal of Pharmacy, noticed, 447.
Nickel in magnetic pyrites, *M. H. Boye*, 219.
Nitrogen, mode of preparing, *Maumené*, 412.
sulphid of, *Fordos* and *Gélis*, 114.
North-polar distance, method of recording differences in, *O. M. Mitchel*, 1.
